μ TMP ensure high precision motion of equipment, part or sample....

1 - Description

μ TMP C 6-200-10 is the smallest stage of our range.

Equipped with a crossed roller bearings without recirculating and prestressed. Provide in a minimal size, good stiffness and high precision.

The motion is operated by an irreversible screw-nut system with backlash compensation.

A stepper motor enables to combine precision, torque and speed.

Resolution and speed can be easily adapted.

Various versions

- Standard, PA use, black anodization possible.
- Use on Vacuum and high vacuum. Wire and modified grease, untreated aluminium color.
- UHV version. Motor, materials, glue and modified lubrication are adaptable on request.
