

AUTOMATIC MACHINE ADHESIVE WRAPPING

DATASHEET ISP

Update : 12/8/2022

1 - Description

This machine deposit, automatically, an advertising adhesive with the client's logo on the circumference of a cylindrical product.

This product is thereby clearly identified, and can be differentiated between competitor's products in store displays.

This machine, also, ensures the automatic transfer between 2 perpendicular conveyors with 300mm difference of altitude.

ISP SYSTEM – Automatic Machine Adhesive Wrapping

2 - Technical data

- Compact machine
