

Update :

*Axle in place*

**This equipment controls the center distance of train axle after assembly.**

## 1 - Application

*Measuring system*

This equipment has optical telescopic sights (theodolite) assembled on guided carriage. The translation is controlled by measuring system.

- The measure accuracy on travel range of 3,3m is  $\pm 0,05\text{mm}$ .
- After use, the set is retractable upwards in order to allow the free passage to axles
